

Fragrance Reference Standard

Conditions and compound list for all chromatograms

Column: **DB-1**

30 m x 0.25 mm I.D., 0.25 µm

J&W P/N: **122-1032**

Carrier: Helium at 25 cm/sec, measured at 150°C

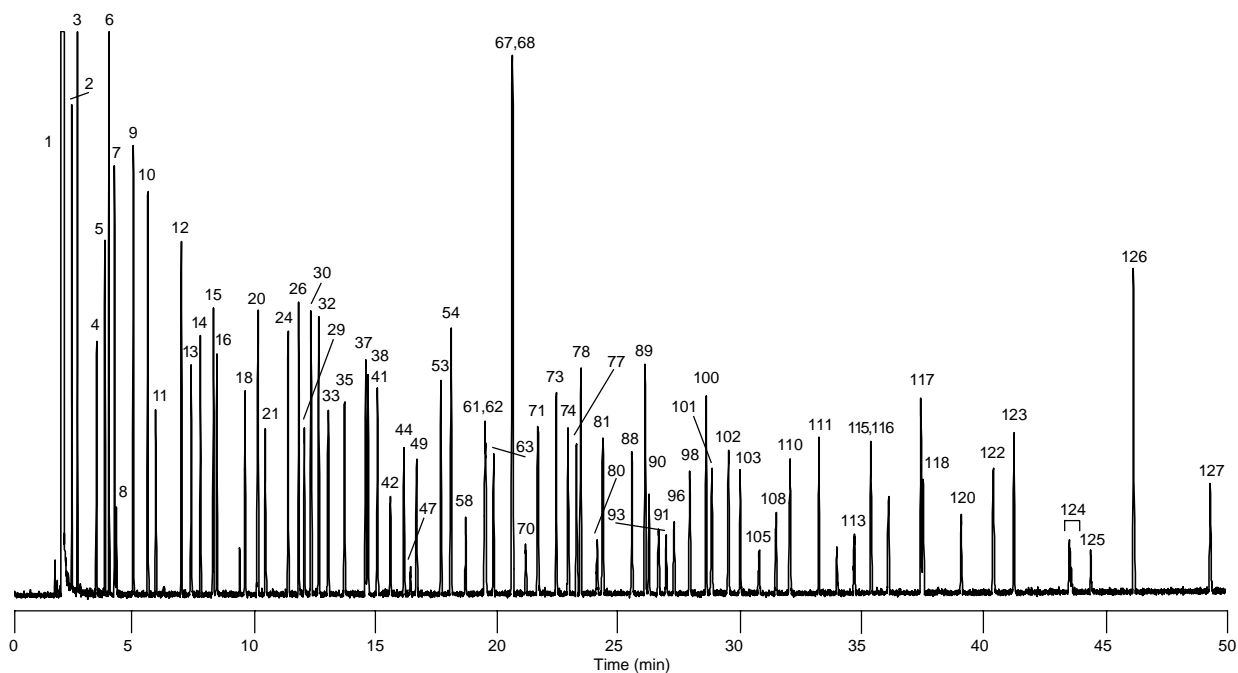

Oven: 40°C for 1 min
40-290°C at 5°/min

Injector: Split 1:50, 250°C
1 µL of a 1:20 dilution of neat sample in acetone

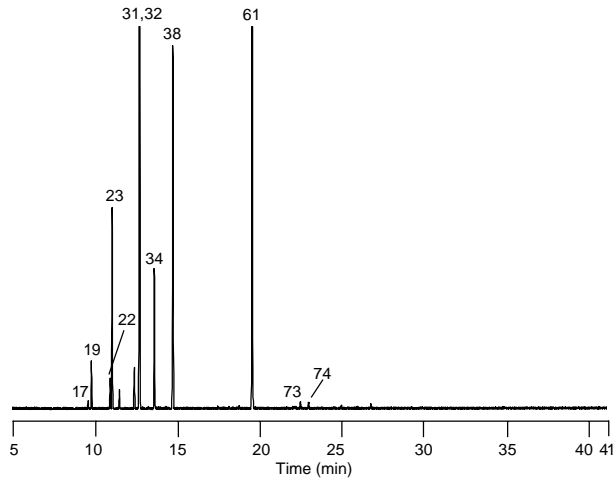

Detector: MSD, 300°C transfer line

Many thanks to Carl Frey, Manager of Analytical Services, Dragoco, and Kevin Myung, Director of Flavor and Perfumery Research, Bush Boake Allen, Inc. for contributing to this work.
